	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### **DETAILED ACTION**

#### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/27/06 has been entered.

### Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claim 1-7, 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crouch in view of Ingham and further in view of Tsuchiya et al (U. S. Patent no. 4,693,454) and Rottenberger et al(U. S. Patent no. 6,588,555).

Crouch discloses:

See figure 1 piston E, passage m at a position near the fully expanded position

Crouch does not disclose temperature compensation or non-return valves. Ingham
teaches temperature compensation and non-return valves (see figure 4 adjustable
pressure-relief/temperature compensation valves 21,22, adjustable non-return valve

23). It would have been obvious to one of ordinary skill in the art at the time the

Application/Control Number: 10/717,916

Art Unit: 3683

invention was made to use temperature compensation and non-return valves as taught by Ingham in the device of Crouch in order to ensure that the proper device pressure is available at all times. Changes in temperature can lead to a change of the spring characteristic. The use of these valves allows the spring rate to be maintained over a variety of temperatures.

Crouch, as modified, is relied upon as above. Crouch, as modified, does not disclose connecting the expansion chamber to a gas volume. Tsuchiya et al teaches connecting the expansion chamber to a compressed air source (see figure 9 source 640). It would have been obvious to one of ordinary skill in the art at the time the invention was made to as taught by Tsuchiya et al. in the device of Crouch, as modified, in order to operate the gas spring at a pressure different than atmospheric pressure (e.g. higher pressure which would produce a higher spring rate).

Crouch does not disclose the bypass as a widening of the cylinder wall. The use of widened sections of cylinder wall are well known as a means of bypass. Rottenberger et al teaches a bypass 21 that is a widened section of the cylinder wall. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use a widened section of cylinder wall for the bypass as taught by Rottenberger et al. in the system of Crouch, as modified, as a bypass path and widened section are functional equivalents and the use of one over the other is merely a design choice. A widened section is easier (and therefore cheaper) to manufacture. It can be formed simultaneously with the cylinder itself and would not require any special machining. A

Application/Control Number: 10/717,916 Page 4

Art Unit: 3683

bypass like shown in Crouch would require either a very complicated mold or an additional machining step.

## Allowable Subject Matter

4. Claim 16 is allowed.

5. Claims 8,15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

# Response to Arguments

6. Applicant's arguments with respect to claims1-7,9 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3683

Any inquiry concerning this communication or earlier communications from the 7. examiner should be directed to Robert A. Siconolfi whose telephone number is 571-272-7124. The examiner can normally be reached on M-F 10 am-3 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan can be reached on 571 272-6786. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
